1	IR data: 2017 Atlantic hurricanes	<p>A. The 2017 hurricane season in the Atlantic was the strongest on record.</p> <p>Warmer water and air add energy to hurricanes.</p> <p>B. The 2017 hurricane season in the Atlantic was the strongest on record.</p> <p>As the climate warms, scientists predict extreme weather will become more common.</p>
2	Satellite image: limb of the Earth	Earth's atmosphere is fragile and finite.
3	Satellite image: lights at night	Switching to renewable energy to generate heat and electricity would cut CO ₂ emissions by 40%.
4	<p>Animated graph: rising levels of CO₂ (over 800,000 years?)</p> <p>Annotations:</p> <ul style="list-style-type: none"> • Humans emerge in Africa (200,000 years ago) • Industrial Revolution (c. 1760) • A few other moments 	<p>There's more CO₂ in the atmosphere now than at any point in the last 800,000 years.</p> <p>Human activity has caused this rapid rise in CO₂ levels.</p>
5	<p>Animation: shrinking sea ice in the Arctic (1979-2017)</p> <p>?</p>	Warmer water is causing sea ice to melt.
6	<p>High-res image: Greenland melting ice</p> <p>?</p>	<p>A. Greenland's ice sheet is shedding 286 billion tons per year.</p> <p>B. Greenland's ice sheet is melting, causing sea levels to rise.</p>
